ENVIRO-USA™ CASE STUDY

A & A Propulsion Services

Location

Mexico

Industry

Maritime/Marine Services

Application

Fuel Spill Prevention

Objective

Safeguarding both water and land environments from accidental pollution

Solutions

19 in. Oil/Debris Boom

PROJECT HIGHLIGHTS

- Successful deployment of 1,000 feet of 19 in. Oil/Debri Boom around the vessel operation zone to create a secure perimeter.
- Proactive spill prevention in protected waters by setting up a dual protection barrier safeguarding both water and land before fuel handling and vessel operations began in environmentally sensitive waters.
- Zero operational disruption with rapid execution allowing the client to maintain full compliance with environmental regulations without impeding their ongoing maritime operations.
