

ENVIRO-USA™ WORK SCASE STUDY

Miami Park

Location

Miami, FL

Industry

Construction

Application

Sediment Control

Objective

Control sediment while expanding the park's walkway. Project had to be DOT compliant while completing this project

Solutions

The intended construction area was surrounded with our manufactured Type 1 DOT Turbidity Curtain

PROJECT HIGHLIGHTS

- Enviro-USA™ worked directly with the City of Miami Beach to consult and manufacture the appropriate floating barrier system.
- Dual curtain layer was deployed for an additional line of protection in order to contain sediment in their work zones.
- Successful deployment and BMP's during construction protected a main park located in Miami, FL from additional environmental impacts to the sensitive surrounding waterways and ecosystem.
