

## ENVIRO-USA™ WORKSCASE STUDY

# Shoreline Restoration OR

### Location

Oregon

### Industry

Marine Construction

### Application

Sediment Control

### Objective

Control sediment and debris during bridge restoration projects along a waterway.

### Solutions

Type 1 DOT

## PROJECT HIGHLIGHTS

- Client was restoring a bridge located above a small pond and needed to contain the debris produced during construction.
- Enviro-USA™ supplied turbidity curtain was deployed along the construction site to be used to prevent materials from escaping unchecked into the waterway.
- Upon project completion the customer reported the curtain worked effectively in containing turbidity within the barrier area throughout the term of the project.
