Completion Date: **Approved By:**

Done	Inspection or Action
☐	Emergency officials and site management have authorized reentry.
☐	A competent person has assessed docks, banks, structures and utilities.
☐	No crew is exposed to downed lines, contaminated floodwater or unstable debris.
☐	Navigation hazards and displaced equipment have been reported as required.
☐	The curtain position has been compared with the pre-storm layout map.
☐	Every section, connector, anchor, buoy and shoreline attachment has been photographed.
☐	Debris is removed only with a safe lift/tow plan that avoids sudden line release.
☐	Flotation freeboard and float-pocket condition are documented.
☐	Fabric, seams, grommets, ASTM connectors, pins, cables and chain are inspected.
☐	Anchor drag, line chafe, chain wear and hardware deformation are documented.
☐	Visible sediment escape or plume conditions are reported and controlled.
☐	Repair, replacement or alternate-control actions are assigned and tracked.
☐	The curtain is not returned to service until it is safe and fit for the intended conditions.
