Corrugated Steel Tanks

Durable Liquid Storage

Made from Corrosion-Resistant Steel

Corrugated Steel Water Tanks provide durable, reliable, and cost-effective water and liquid storage for a wide range of applications. Constructed from high-quality G115 galvanized steel with a corrosion-resistant coating, these tanks are engineered for strength, long-term performance, and demanding environments. Available in a variety of sizes and color options, corrugated steel tanks offer a versatile solution for both temporary and permanent liquid storage needs.

Enviro-USA™ Corrugated Steel Water Tanks are assembled on-site, helping reduce transportation and shipping costs compared with large prefabricated or welded tanks. Capacities range from approximately 700 gallons to more than 700,000 gallons, providing scalable storage solutions for projects of virtually any size. Whether storing water for rainwater collection, irrigation, fire protection, industrial processes, or emergency use, these tanks provide dependable access to water when and where it is needed.

Common Applications Include:

- Rainwater Collection and Storage
- Irrigation Water Storage
- Fire Suppression and Fire Protection
- Mining and Frac Water Storage
- Industrial Process Liquid Storage
- Potable and Non-Potable Water Storage
- Stormwater and Wastewater Treatment
- Aquaculture
- Agricultural Greywater Storage
- Municipal and Emergency Water Storage

CORRUGATED STEEL TANKS

STANDARD FEATURES

- Corrugated Steel Sheets Geotextile Pre-Liner Fittings (PVC)
- Domed Roof
- Aqualiner
- Open Top Available

OPTIONAL FEATURES

- Filtration
- Additional Fittings
- Water Level Indicators (Meets NFPA standards)
- Insulation Wrap
- Immersion Heater
- Shut Off Float Valve
- Side Ladder with OSHA Cage (3 Tiers & Above)

BENEFITS

- Liners Allow for Potable, Non-Potable, and Waste Water Usage
- Ship with Ease—1% of Total Volume
- Install on Site
- Available in Variety of Capacity High-Strength Construction
- Customize to Fit Application
- Withstand Harsh Environmental Conditions

Full Installation Services

Enviro-USA™ provides full installation services for customers in the U.S. and Canada and supervised installations for those outside the U.S. and Canada. (External piping is not included as a part of the installation services.) Tanks are erected by Enviro-USA™ approved installers on a customer-supplied foundation. A leak test should be done immediately following installation, with the customer supplying the liquid.

Manufacturer's Warranty

A 20-year manufacturer's warranty on all tanks is available.

Easy Financing

Enviro-USA™ has partnered with JB2 Funding to provide three convenient financing options. Financing and leasing programs are available for new equipment, machinery, and DOT-compliant water trailers.
