

## Oil Spill Containment Boom Anchor Systems

### What are Oil Spill Containment Boom Anchor Systems?

Oil containment booms are used to prevent or contain oil spills water applications such as calm water, rivers, marinas, ports, coasts and offshore.

**Anchor Systems** are used in order to **allow the boom to stay in place**. They can be used on any oil containment boom size but typically are installed in moving water conditions.

**Enviro-USA's Anchor Systems** are completely assembled and ready to be deployed. Attaching the anchor system to the Turbidity Curtain is as easy as clipping it on. Anchor Systems are in stock and can be shipped with your turbidity curtain.

### Enviro-USA's Anchor Systems include:
